Meeting minutes

FYP Meeting Minutes
Date: 6th November 2024
Time: 10:00 AM
Location: Zoom
Attendees:
1. Salika arbab
2. Sara khan
3. Mam shumaila iqbal

Agenda:
- Review progress on requirements and test cases
- Update on backend and frontend development
- Discuss current challenges in development and testing
- Plan next steps for upcoming tasks

Discussion Summary:
- **Requirements**: Confirmed that requirements are well-defined for consumer and provider signup, including validations for name, email, password complexity, CNIC image, and police clearance certificate uploads. Minor adjustments needed in address validation.
- **Test Cases**: Initial test cases have been created for signup validations, including file size and format restrictions (JPEG for CNIC and PDF for police certificates). Further testing needed for all error messages and edge cases, particularly for address and password formats.
- **Backend Development**: MongoDB database is set up with the collections and schemas for providersignup and addservice. Routes for provider signup (Provider.js) and service addition (AddService.js) have been partially implemented with file upload validations. Discussed refining error handling and ensuring all fields have proper validations as per requirements (e.g., FR-2.1.1 to FR-2.1.7).
- **Frontend Development**: The Provider signup component is functional, with fields for name, email, phone, CNIC image, and police certificate file. Validations are in place but require further testing. The AddService component includes fields for service name, charges, type, and optional picture upload; all validations are set but need alignment with backend checks.

Action Items / Next Steps:

1. **Salika** Refine backend routes in providersignup.js and addservice.js for complete validation of file uploads and field data.
2. **Sarah Khan**: Develop and expand test cases for both frontend and backend validation checks, focusing on edge cases for the signup process.

Next Meeting:
Date: 13th November 2024
Time: 10:00 AM
Location: Zoom
